PROFESSIONAL SUMMARY

Results-driven Information Technology professional and Creative Virtual Assistant specializing in full-stack development, process automation, and technical SEO. Adept at bridging creative multimedia production with complex technical execution to drive business growth. Proven track record of developing cloud-deployed systems, engineering AI-integrated solutions, and optimizing CRM workflows to streamline operations.

CORE COMPETENCIES

Software Development: PHP, Laravel, Supabase, Edge-AI (YOLO object detection)

Cloud & Deployment: Vercel, Render, Netlify, GitHub, Microsoft Azure

CRM & Automation: GoHighLevel, Housecall Pro, Process Automation Workflows

Digital Tools: Adobe Creative Cloud, Cursor Pro, Notion, Google AI Pro

PROFESSIONAL EXPERIENCE

Creative Virtual Assistant & Automation Specialist

- Designed and implemented complex CRM workflows and process automations utilizing GoHighLevel and Housecall Pro.
- Coordinated with cross-functional teams to manage project deliverables for clients in the interior design sector.
- Executed technical SEO strategies and managed digital presence to support client business growth.
- Bridged technical problem-solving with creative multimedia production and website design.

TECHNICAL PROJECTS

Lead Developer | AklatBayon (Internal Library Management System)

- Engineered and deployed an internal library management system featuring an RFID-integrated kiosk and role-based access control.
- Refactored application architecture and managed continuous deployment pipelines across Render and Vercel.

Systems Developer | AeroEdge

- Developed an edge-AI innovation project aimed at detecting and preventing runway incursions.
- Integrated YOLO object detection models with Raspberry Pi 5 hardware for real-time aircraft tracking.

Full-Stack Developer | ErikaTracker & FilCanBites

- Built **ErikaTracker**, a robust financial tracking application utilizing Supabase for backend database management and Netlify for deployment.

- Managed **FilCanBites**, a recipe search application, overseeing API key integration and cloud deployment via Vercel.

EDUCATION

Bachelor of Science in Information Technology

2023 – 2026

FEATI University

- **Key Projects:** University Violation Reporting System (Student Information System Mini-Thesis)

CERTIFICATIONS

- **GitHub Foundations Certification**
- **Microsoft Azure Fundamentals (AZ-900)** (Preparation in progress via GMetrix)
