

VINCE CHARLES BELIGANIO DE GUZMAN

San Juan City, Metro Manila, Philippines
Creative Virtual Assistant & Information Technology Professional

PROFESSIONAL SUMMARY

Recent Information Technology graduate and experienced Creative Virtual Assistant with a strong foundation in full-stack development, CRM automation, and system administration. Proven ability to build scalable web applications, streamline operations through automated workflows, and manage complex data integrations. Seeking to leverage skills in SEO, software development, and technical infrastructure to bridge technical systems with efficient operational outcomes.

PROFESSIONAL EXPERIENCE

Stampstaff

Creative Virtual Assistant (Sep 2025 – Present)

- Manage SEO strategies and maintain WordPress sites to optimize online visibility, traffic, and user engagement.
- Design and implement CRM automations utilizing GoHighLevel, Zapier, and Housecall Pro to streamline business operations and internal workflows.
- Coordinate technical tasks and data management, ensuring robust digital infrastructure for remote teams.
- Edit professional video content utilizing Adobe Creative Cloud to support multimedia campaigns.

TECHNICAL PROJECTS

FEATI PRISM (Capstone Project)

- Developed a centralized platform modernizing student records and conduct violation tracking for FEATI University.
- Implemented real-time incident logging and automated, data-driven reporting features to replace legacy manual administrative processes.

AeroEdge (Innovation Project)

- Engineered an edge-AI runway occupancy monitoring system utilizing Raspberry Pi 5 hardware.
- Integrated YOLO object detection methodologies to accurately identify aircraft and prevent runway incursions.

AklatBayon

- Designed and deployed an internal library management system featuring an RFID-integrated kiosk and strict role-based access controls.
- Configured cloud deployment environments utilizing Vercel and Render for scalable and reliable backend operations.

ErikaTracker & FilCanBites

- Built custom web applications including a financial tracking app (ErikaTracker) and a recipe search engine (FilCanBites).
- Leveraged modern technical stacks including Supabase for backend database management and Netlify for frontend hosting.

EDUCATION

FEATI University — Manila, Philippines

Bachelor of Science in Information Technology (Graduated May 2026)
